

modulewaves::setgeneric4dvalues

```
graph LR; A[modulewaves::setgeneric4dvalues] --> B[modulewaves::ready]; B --> C[modulewaves::locateobjwaves];
```

The diagram illustrates a three-step process flow. It begins with a gray rectangular box containing the text 'modulewaves::setgeneric4dvalues'. A dark blue arrow points from this box to a white rectangular box containing 'modulewaves::ready'. A second dark blue arrow points from the 'ready' box to a final white rectangular box containing 'modulewaves::locateobjwaves'. All boxes have a thin black border.

modulewaves::ready

modulewaves::locateobjwaves
