

modulebasin::readunlockexternalvar

```
graph LR; A[modulebasin::readunlockexternalvar] --> B[modulebasin::ready]; B --> C[modulebasin::locateobjbasin];
```

The diagram illustrates a three-step process flow. It begins with a gray rectangular box containing the text 'modulebasin::readunlockexternalvar'. A dark blue arrow points from this box to a white rectangular box containing 'modulebasin::ready'. Another dark blue arrow points from the 'ready' box to a final white rectangular box containing 'modulebasin::locateobjbasin'. All boxes have a black border.
